# FLOW MEASUREMENT AWIFLOW

## GENERAL INFORMATION

Areas of application	Mass flow measurement for dry or moist biogas, manure gas, landfill gas
Sensor length	305 mm
Flow velocity:	0,3...15 m/s (others on request)

## OPERATING CONDITIONS

Ambient Temperature	-18...60°C
Medium temperature	+5...50 °C (optional -18...121 °C)
Medium pressure	max. 10 bar (optional 34 bar)
Protection type	IP67
Ex approval	Zone 1, ATEX / IECEx: II 2 G / Ex d IIC T6...T3

## SENSOR

Installation	Compact unit for installation in existing pipeline (DN50...350) incl. cable glands, mounting fitting and compression fitting for process connection to internal thread G1/2"
Material	Stainless steel 316L (body), Hastelloy-C22 (thermocouple sensors)
Measured value deviation	± 2% (optional ± 1%) of the measured value plus 0.5% of the final value
Recommended inlet/outlet section	depending on pipe run 10...20 x pipe Ø (inlet) / 3...10 x pipe Ø (outlet)

## | STAND-ALONE

Calibration	with real gas (methane in carbon dioxide)
Signal outputs	+ 4...20 mA for current flow + 4...20 mA for temperature or summation (selectable) + pulse output for summation
Voltage supply	18...36 V DC (6 W max)
Display	optional: two-line, 16 characters each, LCD + flow rate + temperature or total flow

## | COMBINATION WITH GAS ANALYSIS

Calibration	With real gas (methane in carbon dioxide) plus compensation via current gas composition of the measuring gas
Signal outputs	freely selectable: + Ethernet + Modbus RS485 / RS 232 + Profibus + 4...20 mA + more on request
Voltage supply	via gas analysis system
Display	7" TFT touch panel with internal data memory + tabular or graphical display + standard flow <sup>1</sup> Standard flow meter <sup>1</sup> + temperature <sup>1</sup> + absolute humidity <sup>1</sup> + output (in kW) <sup>1,2</sup> + current calorific value <sup>1,2</sup> + energy meters <sup>1,2</sup> + average Calorific value <sup>1,2</sup>
